-----

The IG discussed the proposal to brief NATO Allies on the subject of U.S. and Soviet space systems and their implications for arms control. It was agreed that a briefing would be given in Brussels to a meeting of the NATO Permanent Representatives reinforced by experts from their capitals (the number to be restricted because of the sensitivity of the issue), and that the USG would retain the option of briefing NATO capitals in greater detail later on a bilateral basis.

The IG approved the text of the briefing prepared by the ASAT working group, and directed the working group to meet once more to reach final agreement on view graphs to accompany the text.
